DEFI SUITE OF SMART BOTS ON TELEGRAM
POWERED BY ZIPTOS

ZIPTOS IS THE FIRST MOVER IN SMART BOT TOOLING FOR APTOS

WHAT IS ZIPTOS

ZIPTOS will enable Aptos to expand on Telegram, by lowering the barrier to entering a new ecosystem for all types of investors and builders by making automatic/codeless superior DeFi products. Ziptos first mover product pile-line will be focussed on creating faster, affordable and elevated user experience ranging from a **token deployer (both FA and legacy, setting up LP, swap and choice of multi DEX and best price via aggregator,** to **automatic token multi sender (including NFTs), telegram full stack wallet, vault and a smart earn reward telegram based service as part of Phase 1 product launch**

ZIPTOS PRODUCT VALUE ECOSYSTEM- PHASE 1

- Easy access/ low entry barrier to Aptos ecosystem-First mover.

- Codeless interaction for new and existing Devs and investors

- Capture retail market share via Telegram that has over 700 million userbase and growing. Supports blockchain and will extend to payments, merchants, revenue sharing etc.

- Secured and Audited code base

- Cutting edge smart tools to cover end to end of project execution i.e. deployer to locker, LP addition, Swap, airdrop, NFT, wallet etc.

- Revenue sharing with holders via native token (launch TBD)

- Low cost of using the services, easy to upgrade

BENEFIT TO APTOS

- Easy migration of communities/buyers from other chain to Aptos. Community is the core of any chain

- Increase transaction and trading volume resulting in growth in mc of APTOS token and heightened visibility

- Incentivise / encourage new Devs to use MOVE tech and build using affordable and accessible Ziptos tools

- Enable high volume meme launches, bring new features like disable mint, locker to Aptos chain

- Allow interoperability and interaction with other Aptos tools/DApps, expanding crypto reach to normies

- Bring visibility to new and experienced MOVE Devs around the globe

- Generate revenue for Aptos chain due to increased network usage

ZIPLOYER

TOKEN DEPLOYER FOR APTOS

POWERED BY ZIPTOS

ZIPLOYER is the first ever telegram based token deployer and launcher on Aptos chain- powered by ZIPTOS (**already LIVE**). Complementing our motto of first to market, this state of the art token deployer is extremely easy to access, simple to use with elevated UX. This is fully automatic and supports both the lates Fungible Asset and Legacy tokens. Users will be able to add LP and also perform swaps. Mint is disabled so no chances of rug in that regard.

"

Think, select, deploy and launch

FEATURES

- Logo updates to Petra wallet via image upload, add LP, swap tokens, multiple pool options, ready to launch within 2-3 minutes

- 1 APT for legacy and 2 APTs for Fungible Asset

- Integration with all the supported DEXs

- Completely secured as the LP pools aren't held by Ziptos (still maintained by the DEX), Ziployer connects user to multiple LP pool options within TG itself

- In-built token swap feature

- Revenue sharing, motivating investors to buy and hold native token

- Continous support, highly scalable and customization as per marker needs- ALL IN ONE!

BENEFITS

- Codeless, completely automatic, encouraging normies who can't code

- Increase transaction and trading volume due to multiple DEX options underlying the bot

- Less reliance on expensive ways to deploy, MINT DISABLED so safe

- Enable high volume meme launches, bring new features like disable mint, locker to Aptos chain

- Swap feature gets the best price due to integration with a well known aggregator

- Bring people from chains other than APTOS, opportunities to earn while build, create tokens and trade

- Generate revenue for Aptos chain due to increased network usage

ZipDriP

Automatic Token multi sender

powered by ZIPTOS

ZIPLOYER is the first ever telegram based token deployer and launcher on Aptos chain-powered by ZIPTOS (**already LIVE**). Complementing our motto of first to market, this state of the art token deployer is extremely easy to access, simple to use with elevated UX. This is fully automatic and supports both the lates Fungible Asset and Legacy tokens. Users will be able to add LP and also perform swaps. Mint is disabled so no chances of rug in that regard.

FEATURES

- First ever token airdrop product on Telegram

- No limit on number of tokens and number of wallets
